

# Release Notes: Network GAT Interface Specification v1.1

This document lists the changes made to the Network GAT Interface Specification between v1.0 and v1.1.

## GSA Administrative

### Clarifications

GSA Management decided to relocate the Categorization of Standards section previously shown in the About This Document chapter. Going forward this information will be available on the GSA website. Changes to the standard referenced to SSMP-566 are included on the website.

## About This Document Chapter

### Changes

1. About This Document
  - a. Categorization of Standards. Updated the categorization of this standard to Proposed. SSMP-566

## Network GAT Interface Overview Chapter

### Changes

1. Introduction
  - a. Terminology: Added new term GAT End-Client and modified definition of GAT Server. SSMP-570

## GAT Server Supported HTTP Verbs Chapter

### Changes

1. Component Resources.
  - a. Component Details.
    1. Request Parameters: Added endClientType and endClientID as optional parameters to both request and response. SSMP-570
  - b. Component Search.
    1. Request Parameters: Added endClientType and endClientID as optional parameters to the request. SSMP-570
2. Verification Task Resources.
  - a. Create Verification Task.

1. Request Parameters: Added endClientType and endClientID as optional parameters to the request. SSMP-570
- b. Verification Task Details.
  1. Response Information: Added endClientType and endClientID as optional properties of the response. SSMP-570
  2. Response Information: For security reasons, removed support for seed, salt, startOffset, and endOffset fields. SSMP-567
- c. Verification Task Search. Added endClientType and endClientId as optional parameters to the request. SSMP-570
3. New section, Verification Search Resources, is added to support authentication of multiple components. SSMP-567

## Data Types Chapter

### Changes

1. Data Types
  - a. endClientType Enumerations: Added enumeration values for endClientType. SSMP-570
  - b. algorithmType Enumerations: Added a set of new algorithm types. SSMP-567

## Event Codes Chapter

### Changes

1. New Event Codes Chapter added.
  - a. Event Code Table. Three event codes added for reporting thru GSA's Simple System Interface. SSMP-568

## Sample Messages Chapter

### Changes

1. Component Details.
  - a. Added example using new endClientType and endClientId parameters. SSMP-570
2. Component Search.
  - a. Added example using new endClientType and endClientId parameters. SSMP-570
3. Create Verification Task.
  - a. Added example using new endClientType and endClientId parameters. SSMP-570
4. Verification Task Search.
  - a. Added example using new endClientType and endClientId parameters. SSMP-570
